Education

Thapar Institute of Engineering and Technology — Patiala, Punjab
B.Tech in Computer Science and Engineering, CGPA: 8.53/10.0 — *Expected May 2027*

B.C.M School — Ludhiana, Punjab
High School: 12th – 94%, 10th – 94.8% — *2023*

Experience

Data Science Intern — June 2026 – July 2026
Axis Bank — *Mumbai, Maharashtra, India*

- Queried and transformed **500K+** corporate grievance records across voice, email, and digital channels using **Oracle SQL** to uncover resolution bottlenecks and help reduce average complaint closure time.
- Bridged business and data teams on the **Tableau-to-Power BI** migration: gathered stakeholder requirements, agreed KPIs and business definitions, and migrated the existing dashboards to **Power BI**.
- Replaced manual report checks with an automated validation and scheduled email-reporting workflow (**SQL**, **PySpark**), improving stakeholders' trust in the data and reducing manual reporting effort.

Projects

AgentStream – Multi-Agent LLM Orchestration Platform | *Python, LangChain, LLMs*

- Built a **Python** orchestration layer coordinating **3 locally-hosted LLMs** as specialized agents, with **tool calling**, task routing, agent-to-agent delegation, turn-taking, and output aggregation into one coherent response.
- Engineered a custom **WebSocket** streaming protocol that delivers each agent's tokens to the frontend in real time, making multi-agent reasoning observable as it happens.

Talkeys – Event Ticketing Platform (3,500+ Users) | talkeys.xyz | *Express.js, MongoDB, React.js, GCP*

- Deployed and scaled the backend on **GCP** for thousands of concurrent requests, sustaining **99.9% uptime** at peak.
- Built a full-stack ticketing platform with a **RESTful API** backend and QR-code scanning that admits only valid tickets.
- Integrated the PhonePe payment gateway API with **webhook callbacks** for secure, end-to-end ticket transactions.

Fooddle – Food Delivery Platform (5,000+ Users) | fooddle.in | *Django, PostgreSQL, React.js*

- Built and maintained **RESTful** backend services and **PostgreSQL** databases, processing **10,000+ orders** and supporting **100+ concurrent daily transactions**.
- Architected a full-stack food delivery platform connecting students with campus vendors, with PhonePe payments.

Technical Skills

- **Languages:** Python, JavaScript, C++, SQL
- **Frameworks:** Django, Express.js
- **AI & LLMs:** LangChain, LangSmith, RAG, multi-agent orchestration, real-time token streaming (SSE)
- **Databases:** PostgreSQL, MongoDB
- **Cloud & DevOps:** GCP, Docker, GitHub Actions (CI/CD)
- **Core CS:** Data Structures & Algorithms, Computer Networks, DBMS, OOP

Leadership & Volunteering

General Secretary — Aug 2025 – May 2026
Creative Computing Society, Thapar University — *Patiala, India*

- Organized and led large-scale technical events including **HackTU 6.0 & 7.0**, managing on-ground execution, stakeholder coordination, and issue resolution for **450+ offline participants**.
- Conducted technical workshops on **Artificial Intelligence, Web Development, and Git/GitHub** for **200+ students**, building relationships with peers, faculty, and sponsors.
